Counselling & Psychotherapy Transcripts, Client Narratives and Reference Works

● Online database
  - 40,000 pages of transcripts of therapy sessions
  - Over 40,000 pages of first person primary accounts
  - Over 25,000 pages of SAGE handbooks and reference works.
● Accessible by:
  - Keyword
  - Subject
  - Therapy Type
  - Symptom
● Sold by subscription or a perpetual license
Purpose of the File:

- To improve graduate and undergraduate training in psychology
- To facilitate sociological, anthropological, linguistic and literary study of human interactions
- View personal accounts by someone afflicted with a terminal illness and read how they feel and what kind of issues they’re grappling with
- See practical approaches in action and how the client responded
- Quickly find academic explanations and a theoretical grounding for what’s going on
Session Transcripts:

- Previously unpublished transcripts of > 2,000 hours of psychotherapy sessions.
- Full text of therapist-client conversations
- Edited only to preserve anonymity to American Psychological Association guidelines
- Successful, and less successful, treatment sessions dealing with
  - post-traumatic stress disorder,
  - schizophrenia,
  - bipolar disorder,
  - childhood trauma,
  - sexual abuse,
  - eating disorders,
  - many other conditions….
Primary Accounts:

- First person non-fiction account describing the experience of mental illness and its treatment.
- Makes it easier to understand the disorder, seeing it from an actual patient’s point of view.
- Licensed from publishers.
- Some previously unpublished material.
- In all cases we indicate sources and provide indications of reliability.
Reference Works:

- *The Handbook of Counseling*
- *Handbook of Group Counseling and Psychotherapy*
- *Encyclopedia of Behavior Modification and Cognitive Behavior Therapy*
- *Handbook of Counseling and Psychotherapy with Men*
- *Handbook of Counseling Women*
- *The Handbook of Narrative and Psychotherapy*
- *Handbook of Emotional and Behavioral Difficulties*
- *Handbook of Multicultural Counseling*
- *Handbook of Dynamics in Parent-Child Relations*
- *The Handbook of Humanistic Psychology*
- and others....
Welcome to Counseling and Psychotherapy Transcripts, Client Narratives, and Reference Works

Counseling and Psychotherapy Transcripts, Client Narratives, and Reference Works is a searchable collection containing real transcripts of therapy and counseling sessions and first-person narratives illuminating the experience of mental illness and its treatment, as well as reference works to contextualize the primary material. New material is added on a biweekly basis and when complete, the database will contain more than 2,000 session transcripts, 40,000 pages of client narratives, and 25,000 pages of secondary reference material. The database currently includes approximately 32,700 pages of material, including more than 8,000 pages of session transcripts, more than 11,000 pages of client narratives, and more than 12,000 pages of secondary reference material. Physical Development and Growth

Differences in physical growth are apparent from everyday observations of people around us. We differ in terms of height, weight, the relative length of our body proportions, and fitness. We also differ in our abilities to move and perform physical skills and tasks. These differences provide valuable insights into our maturation, overall development, and health. As such, the study of physical growth and development is central to child development, medicine, education, and a host of other disciplines. It is also a subject of personal interest to all people in possession of a body.

STAGES OF PHYSICAL GROWTH

The general pattern of physical growth is similar for all individuals. There can be considerable variations, however, in terms of the rate and timing of growth and the size attained. Chronological age provides an obvious point of reference for observing and recording growth. Its significance should not be overstated, though; biological events and processes follow their own schedule. As it is sometimes said, biology does not celebrate birthdays!
